

# Summer Reading 2020

Be a Reading Family and Commit to Summer Reading!

The research says: "Summer reading loss refers to the decline in a child's reading development that can occur during summer vacation when they are away from the classroom and not participating in formal literacy programs" (Allington & McGill-Franzen, 2003). The research is consistent: when children do not read during the summer, the impact of summer reading loss is significant for all. Students who do not read during the summer lose approximately three months of progress. These months accumulate over time and students may continue to fall behind their peers.

Our goal is to keep students reading year round in order to maintain their current reading level. We want to stop the summer learning slide.
